Art Unit: 3634

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 3,4, drawn to a method of manufacturing a bracket, classified in class 29.

II. Claims 5-9, drawn to a bracket, classified in class 160.

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by another and materially different process such as by assembling the bracket from multiple pieces and adhering them involving several operations.

2. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, wherein, the search for each respective invention is different, restriction for examination purposes as indicated is proper.

Art Unit: 3634

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
